

## Distribution of cotton bag to reduce the use of Plastic

The NSS unit in collaboration with the Fashion Designing of the College worked together in the Mission life Project for Environment Sustainability so the Unit shouldered the project of **cotton bag making and distribution**. Around 650 cotton bags were sewn. The used of plastic hasn't ceased or dwined over a period of time. Hence, through this project, cotton bags have been distributed by the volunteers to 158 household at Pommura Village and the rest is distributed to the others adopted villages. The volunteers graciously explained to the villagers the negative impact of plastics use on the environment and prompted them to stop using plastic bags.
