

FIELD TRIP TO NONGKHNUM

On the 13th March, 2025, the Khasi Department had taken the 6th Semester students for a Field Trip to Nongkhnum River Island (West Khasi Hills). A group of 34 students was led by 5 faculty members. On reaching Nongkhnum, we could spend time together at the bank of the River filled with sand. The people living in those areas earn their living by gathering and selling sand. We spend a few hours there capturing pictures.

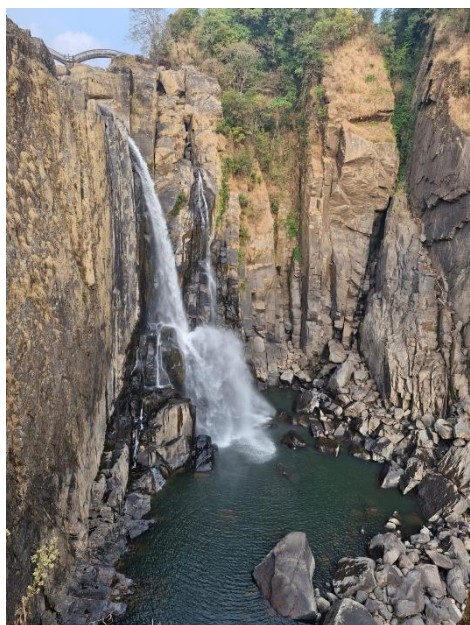

Moments later, we headed to the other side of the River to see the waterfall called, 'Shah Thum Fall'. It was really a natural scenic beauty where group photos were also taken. We also visited, Weinia Falls which is 6 to 7 kilometers away from Nongkhnum River. It was indeed a very nice water fall. The scene filled our hearts and mind of the richness of our land which God has bestowed upon us through our Mother Nature.

The trip experience was not only a blessing to all of us but also taught us that we should always be grateful to our God who is the Creator and it also taught us to preserve Nature and maintain cleanliness towards our surroundings.

We returned to College and reached at around 8:45 PM. The trip to Nongkhnum was really a memorable one.

Objective: The main objective of the trip is enable students to explore the beauty of nature, to learn about various cultural aspects as well as to have more knowledge on the richness of tourism in the state.

Expenditure: Rs, 15,000 (Rupees fifteen thousand only)
