

**Report on Awareness Program on Rain Water Harvesting, 2024**  
**Organized by Swachhta Team & Extension Services Cell**  
**Lady Keane College, Shillong**

**Place: Umjathang, Mawsiatkhniam**

**Date: 31/05/2024**

Two Programme officers and 15 Volunteers participated in the Awareness Program on Rain Water Harvesting Organised by the Swachhta Team and Extension Services Cell of the College. The main focus of this programme was taking care of the environment, an activity which we contribute by planting more seedlings and plants. We went there on 31<sup>st</sup> May, 2024.

Dr. D. G Marbaniang gave us a small speech on Rain Water Harvesting. The headman of the village, the School Principal and our Principal, Dr D.K Mukhim also gave a small speech on how we can harvest rain water.

Under the guidance of experienced mentors and with the help of the teachers and children from Umjathang nursery school, we embarked on the tree planting process. Through this volunteering experience of helping the environment, we learned that it was not just about digging holes and planting saplings but it was a journey of growth, learning and environmental advocacy.
