

Spoken Tutorial Software Training Programme 2021-2022

The Spoken Tutorial Project is the initiative of the “Talk to a Teacher” project of the National Mission on Education through Information and Communication Technology (ICT), launched by MHRD, Govt. of India, to promote IT literacy through Open Source Software.

A spoken tutorial is an audio-video tutorial that explains an activity performed on the computer. An expert explains the working of software, by demonstrating it on the screen, along with a running commentary. It is a recording of an actual session created for self-learning. As a result, it can capture every step that is required to explain an activity. This completeness combined with an accompanying audio-video tutorial makes the spoken tutorial the best way to document and to explain software or a computer based activity. For this type of learning, one needs a headphone and a computer and it allows every participant to learn at their own pace. A variety of Spoken Tutorials on various Free and Open Source Software (FOSS) in various Indian Regional languages are made available through this project.

Foss Center , Lady Keane College has organised Spoken Tutorial for **January-June 2021** and **July-December 2021** session as a part of an annual activity. It was a two-day self-paced certificate program. The tutorial was conducted in the BCA Laboratory for 2 hours as instructed and the rest of the tutorial lessons were completed by the participants at their convenient time and place.

Details of the training conducted:
